

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Plans and Specifications and Advertisement for Bids for
Cherokee Lane Improvements, 230' S/Kettleman Lane to Poplar Street

MEETING DATE: January 2, 1992

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council approve the plans and specifications for
the **above** project and **authorize** advertising for bids.

BACKGROUND INFORMATION: This project consists of reconstructing the left-turn
pockets on Cherokee Lane at Kettleman Lane. Also included
in the project is the installation of pavement reinforcing
fabric and an asphalt concrete overlay on the north-bound
lanes from 200 feet south of Kettleman Lane to Kettleman Lane and the south-bound
lanes from Poplar Street to Kettleman Lane.

The specifications require that the project be phased so that at least one travel
lane in each direction will be open to traffic at all times.

This project was originally budgeted to improve the Cherokee Lane approaches at
Kettleman Lane only. Further engineering studies have extended the limits of the
project, hence an additional appropriation will be recommended at the time of bid
award.

FUNDING: Originally Budgeted: 1989/1990
Budgeted Fund: Gas Tax
Current Appropriation: \$ 60,000
Total Project Estimate: \$127,000
Bid Opening Uate: 1/22/97

Jack L. Ponsko
Public Works Director
